I love to interview people from different industries and write pages to help readers. When you apply for a desktop-level job, besides asking general questions about yourself, the interviewer will also ask you questions that test your technical proficiency. Desktop support engineers are required to have a deep understanding of basic as well as intermediate-level concepts. The interviewer can ask you to explain the concept of the OSI model or TCP/IP model or ask you fact-based questions to test your memory power. They can ask you questions on desktop or server-level issues. Probable Desktop Support Questions Who is a desktop support engineer, and what are their duties? Why do you want to join the IT industry? What is the difference between x86 and SysWoW64 folders? I could go on and on forever writing questions and you could also go on and on searching for "Desktop Support Engineer Interview Question," but the fact is that if you are going for L1 (level 1) positions, you only need to do your basics well. Answers you have had the training, practicals, and stuff like that, now answer the questions in your own words. Simply mugging up the answers will be a recipe for disaster. A quick Google search of the question will reveal all the answers. Surf for the answers, and in the process, you'll learn, and once you learn, you won't forget at the time of the interview. Practical Demonstrations Besides fact-based questions, you will also be tested on your practical skills. They could ask you to do the easy task of installing the operating system in front of them or even ask you to solve a problem faced by a user right there. How to Appear Less Nervous at an Interview This article is accurate and true to the best of the author's knowledge. Content is for informational or entertainment purposes only and does not substitute for personal counsel or professional advice in business, financial, legal, or technical matters. © 2010 KannanAzar on August 29, 2018: Could you please send me answers of all questions at azarkh1234@gmail.com Thank you.
